

INTRODUCTION

BEACHES OF BATEMANS BAY AND THE EUROBODALLA COAST is designed as a concise, visual travel guide to the beautiful beaches found on the South Coast of NSW, Australia.

The Eurobodalla Coast has been divided into eight sections, each represented by a coloured tab. These tabs are displayed on the side of each section, on the rear flap for quick reference and on the Contents page opposite. To navigate to an area of interest, simply locate the coloured section in the guide.

The sections are arranged in logical geographic areas, from North to South. Each section starts with a general description, area map and an 'At a Glance' overview of the beaches found in that area.

This is followed by a beach-by-beach description with photographs, maps and list of features to help you plan your visit. The features are those found either on the beach, or within easy walking distance of the beach. Beach names used are those found on official Australian Government maps. When a beach name is not on the official map, we have used the generally accepted local name.

For detailed town mapping, please refer to the map section at the back of the book.

We hope you enjoy discovering the beaches of the Eurobodalla Coast and that this publication makes it a more enriching experience!

Peter and Manuela Henry

CONTENTS

MURRAMARANG NATIONAL PARK *(Pages 7-35)*
