

BEACHES OF BYRON BAY AND THE NORTHERN RIVERS is designed as a concise, visual travel guide to the beautiful beaches found on the North Coast of NSW, Australia.

Described as the Northern Rivers, the coastline from Tweed Heads to south of Yamba has been divided into six sections, each represented by a coloured tab. These tabs are displayed on the side of each section, on the rear flap for quick reference and on the Contents page. To navigate to an area of interest, simply locate the coloured section in the guide.

The sections are arranged in logical geographic areas, from North to South. Each section starts with a general description, area map and an 'At a Glance' overview of the beaches found in that area.

This is followed by a beach-by-beach description with photographs, maps and list of features to help you plan your visit. The features are those found either on the beach, or within easy walking distance of the beach.

Beach names used are those found on official Australian Government maps. When a beach name is not on the official map, we have used the generally accepted local name.

For detailed town mapping, please refer to the map section at the back of the book.

We hope you enjoy discovering the beaches of Byron Bay and the Northern Rivers and that this publication makes it a more enriching experience! Peter & Manuela Henry

*New Zealand Beach*
